Results-driven data engineer with a BS in Data Science and a Master's in progress, building production data pipelines for renewable energy assets. Passionate about leveraging analytical skills to extract actionable insights from complex datasets and solve challenging problems. I drive projects that enhance strategic decision-making and fuel business growth.

Professional Experience

Clearway Energy Group

Asset and Energy Management Analyst / Solutions Architect

Scottsdale, AZ
MAY 2025 – PRESENT

- Designed and implemented data pipelines using Dagster, dbt, Polars, and Snowflake to automate ingestion, transformation, and validation of renewable energy asset data (solar, wind, BESS).
- Built and optimized VER (Variable Energy Resource) data pipelines integrating with energy solution APIs for operational metrics, scheduling, and performance tracking.
- Built financial and market reporting workflows in Hex and Snowflake, blending Intercontinental Exchange energy data and internal forward energy curves to enhance forecasting and asset management insights.

OneAmerica Financial

Business Analyst Intern

Indianapolis, IN
MAY 2024 – AUG 2024

- Led the migration of 10+ years of Google Analytics data from 67 websites by designing and deploying custom Python scripts—resulting in enhanced data accessibility and 100% data integrity verified through automated validation.
- Refined requirements elicitation skills by actively engaging stakeholders through structured interviews and collaborative workshops, translating diverse business needs into clear, actionable project specifications.
- Orchestrated the redesign of the IT intranet by collecting and synthesizing qualitative data from six cross-functional teams, reducing feature bloat, and delivering a user-centric platform that enhanced communication and efficiency.
